## O Our handcrafted luggage

THE EYE  
LIMITED STINGRAY EDITION

Made exclusively with natural pigments, without the use of opaque paints. Natural marks and variations are not imperfections, but part of the unique history and character of each individual hide.

Our leather requires minimal care and is designed to last for many years. As every leather has its own characteristics, specific care instructions may vary.

To preserve its natural beauty:

- Gently clean the surface with neutral liquid soap and water.
- While the leather is still slightly damp, apply a light leather cream to maintain its natural moisture.
- Allow it to dry naturally, away from direct sunlight.
- For regular maintenance, simply dust with a soft, dry cloth.
- Do not rub or scrub the surface, as this may damage the natural grain.
- Never use aggressive chemicals, solvents or polishing products.
- Always test any cleaning treatment on a small, hidden area first.
